Kaba B-inspired

More than just time recording

editorial

Dear reader,

Technology is advancing and changes the way we interact with others- tablets and smart phones are taking over in the personal space and now as well in the workspace. Kaba is recognising this trend with a great new approach to WFM needs: **Kaba B-inspired – the system with apps for time recording, leave request and much more.** Take a glimpse at this stunning new technology combined with Kaba's proven solutions.
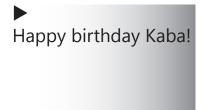

The first 'Mastering SAP HR and Payroll Conference' took place in Johannesburg in mid-April and attracted more than 260 professionals whos daily work and deliveries are based on the same ERP application - SAP HCM. The newly created platform for these professionals turned out to be a great opportunity to exchange thoughts and experiences made while implementing or operating SAP HCM.

AWM360 has been a driving force during these days at Sandton Sun Convention centre: We displayed the latest Kaba solutions and hardware and invited participants to listen to various presentations covering in particular the burning topics related to Workforce Management and Time & Attendance.
Among many topics discussed, one particularly was prevailing: companies' need for reliable time and attendance related data collection. More companies then ever recognise Workforce Management and T&A in particular as a key element to better manage their workforce, their payroll and their compliance risks combined with substantial cost savings. The way forward to achieve this is of course a fully integrated solution.

Let's B-inspired!
Enjoy the read

Happy birthday Kaba!

150 years of Kaba

Franz Bauer founded his locksmith's and safe factory in Zurich (Switzerland) in 1862. The company's name is a combination of KA for "Kassenschrank" (German for safe) and BA for Bauer. Ever since then, Kaba has regularly made headlines in the security industry with its outstanding products and solutions. The company's strong market position, the numerous examples of its outstanding engineering skills, and its passion for optimum security solutions guarantee an equally promising future.

150 years of innovation

Innovation is the central driver behind Kaba's business, as underlined by the company's long and broad-based track record.

Thanks to its outstanding engineering achievements, Kaba regularly sets new trends in terms of security and convenience. Technological leadership is crucial to the company's successful positioning in the various markets, which is why Kaba is so determined to maintain its edge in this regard.

Value to customers is always a priority, and Kaba only launches new technologies when they have been made genuinely user-friendly. Kaba also ensures that new solutions can always be integrated effectively into customers' existing systems. Compatibility results in investment security for customers, giving Kaba a clear competitive advantage over many rival companies and their non-standardized product ranges.

Because Kaba products are based on compatible technology platforms, its customers have the widest possible range of options for networking and upgrading, regardless of the country in which they buy and use the products. Throughout the world the Kaba brand stands for pioneering, future-proof solutions.

Did you know that...

...Kaba's products work perfectly all over the world, no matter how extreme the conditions?

... on an island off the coast of Equatorial Guinea in West Africa, AMPCO runs one of the world's largest methanol production plants. The access and time recording system installed by Kaba uses **B-COMM ERP** communications software, which has been integrated into the existing SAP system on the customer's request, coupled with **B-Net 9340 biometric terminals.** Despite strong winds and tropical rain storms, the installation has always worked flawlessly.

... in Greenland, the retail chain Pisiffik uses ten reader stations in its stores for recording finger templates, as well as 38 separate **B-Net 9320 biometric terminals** for recording hours worked.

...the **Kaba star locking system** theoretically has 18 quadrillion possible locking combinations? That's 18,000 trillion, or 18,000,000 billion – or 18 followed by 15 zeros. So when a large operation like Zurich Airport, with thousands of locks, needs to formulate a complex locking plan, the puzzle becomes as hard as the hardest Sudoku. The art lies in finding the right permutation – calculating the possible combinations and placements for the tiny holes bored into the keys. For security reasons, Kaba only uses a fraction of the immeasurable possibilities.

Kaba B-inspired - More than just time recording

Kaba B-inspired – The new Kaba information system is much more than just time and attendance

New terminals – New App concept – New level of perfection

With Kaba B-inspired, the new Kaba Information System, all your staff can save time, communicate with each other and get hold of information quickly. You just install the Apps that you need. No more and no less. If you need a new one later, you just add it.

Smart: Apps for specific tasks within the organization, e.g. for leave and flexitime requests, briefings or canteen bookings. No more „red tape", thanks to an easy-to-operate, versatile system.

Efficient: Contact all staff easily and address current issues. Save time and simplify (communication) processes.

Simple: Problem-free installation, operation, maintenance and expansion. Just select the modules you really need and you can simply add new functions later.

Flexible: The modular construction of the system means it can be deployed across different industries.
This makes communication fun, for all industries, for all companies and for all eventualities!s.

The open system, with Apps for everybody

The standard functions can be deployed across different industries and can be extended at any time, even through Apps specially developed for your requirements.

▶   Standard bookings (In, Out, Official Absence)
▶   Leave and flexitime requests
▶   Briefing
▶   Visitor registration
▶   Time corrections
▶   Message centre
▶   and more …

The Kaba App-Shop

Development never stands still

The App Shop is a tool that gives you an easy way to buy additional functions that you need. The Apps are distributed to the installed Communication software B+, which then assigns them to the various devices.

Initially, only Apps developed by Kaba will be offered through the shop. At a later stage, third party developments that have been tested and approved by Kaba will be added.

Stay up to date and keep an eye on the Kaba App Shop, which we are constantly stocking up with new solutions and Apps.

▶   Surveys
Flexible and simple: Customized surveys of visitors and staff can be carried out and evaluated quickly with the App.
▶   Canteen
Quick and simple: With this App, you can select and order from the canteen menu.
Efficient: No more tiresome paperwork and the kitchen can plan, evaluate and bill more efficiently.
▶   Personal data record changes
Revolutionary: It's never been easier and quicker to change or update addresses and other personal details, than with this App.

Kaba B-inspired - Terminals

Kaba Terminal B-web 97 00

High-tech in an elegant design

The B-web 97 00 terminal fulfills a wide range of tasks in the areas of professional time recording, access control and in the provision of customer-specific information and applications.

The user-friendly Apps covering many different functions, can be selected through the touchscreen and appear in brilliant clarity behind the high-quality glass front panel.

The overall design concept is completed by the clean-cut lines of the device, the graphical user interface elements and the reader unit for RFID media, which is conveniently angled towards the user.

▶ 7" Touchscreen with brilliant display
▶ Communication via Ethernet and/or WLAN
▶ Communication via Bluetooth or 3G
▶ High definition camera system
▶ Different power supply options, PoE, 230VAC connection, 24VDC via power supply
▶ Integrated microphone and speaker
▶ Video function
▶ Supports all commonly-used audio and video formats
▶ Simple installation

Terminal B-web 96 00

Quality for standard functions

The B-web 96 00 terminal is characterized by its operational comfort, its compact size and its attractive design, with touchscreen. It represents the ideal entry-level solution for all those who need simple applications in the area of time recording.

▶ 3" Touchscreen
▶ Communication via Ethernet and/or 3G
▶ Mini USB socket for connecting external readers
▶ Different power supply options, PoE or 12V via pluggable power supply
▶ Integrated speaker
▶ Support all commonly-used audio formats
▶ Simple installation
▶ Ideal for basic tasks in the area of time recording

The future is mobile!

Kaba B-inspired – the system that is fit for the future

Just imagine a system that doesn't only work on terminals, but also on Smartphones, desktop PCs and tablet devices.
Just imagine a system where staff, no matter where they are in the world, can fill out their vacation requests or record their working hours.
Just imagine a system that transmits its data via WLAN or 3G, which means that it can be deployed completely flexibly.
Just imagine a system with no limit to the functions that it can carry out, thanks to Apps.
And now just imagine: This will all be possible with Kaba B-inspired.

Imprint

The software for the system - Communication Software B+

B+ is the new user and communication software that is used to manage the B-web 97 00 or the B-web 96 00 terminals.

Terminal configuration and App administration are amongst its basic functions. During its development, Kaba went to great lengths to ensure that the installation of the software and the connecting of the terminals should be as easy as possible, so that no specialist knowledge is required.

System maintenance and the addition of new functions, such as safety briefings, surveys, menu plans, etc., have also been made extremely simple as the Communication Software B+ delivers exactly the component that is required.
